The one-minute blink routine

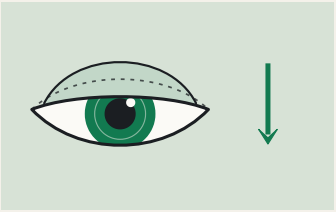

Slow, complete blinks for eyes that dry out at a screen.

- For tired, strained eyes

About 1 minute · Once or twice a day

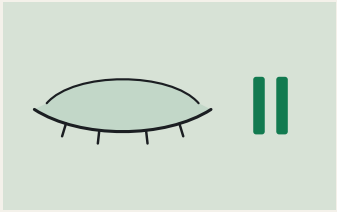

1 Close slowly

Let your eyes close gently, as if you were falling asleep.

— 2 seconds

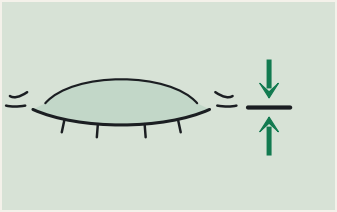

2 Pause

Keep them closed. Relax your forehead and jaw.

— 2 seconds

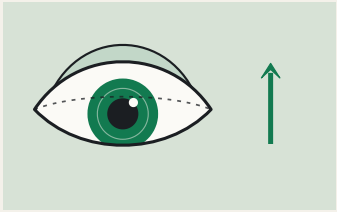

3 Squeeze softly

Press your lids together lightly. No strain.

— 2 seconds

4 Open

Open your eyes slowly and look ahead.

— Repeat 10 times

Do this routine during a break from your screen. Stop if your eyes feel uncomfortable. General guidance, not medical advice.
